N All M F

Age at Diagnosis of FH

Age

BMI (optional)

Family History of Hypercholesterolaemia

Family History of Premature CVD (Men <55, Women <60)

Personal History of Premature CVD (Men <55, Women <60)

Tendinous xanthomata

Arcus cornealis prior to age 45 years

Highest pre-treatment lipids:

Cholesterol concentration (mmol/L)

XY +- SD

LDL-cholesterol concentration (mmol/L)

XY +- SD

Triglyceride concentration (mmol/L) - optional

HDL-cholesterol concentration (mmol/L) - optional

Lp(a) concentration (nmol/L) - optional

On treatment lipids:

Cholesterol concentration (mmol/L)

LDL-cholesterol concentration (mmol/L)

Triglyceride concentration (mmol/L) - optional

HDL-cholesterol concentration (mmol/L) - optional

Lp(a) concentration (nmol/L) – optional

Treatment

- Statin
 - Atorvastatin
 - Dose
 - Rosuvastatin
 - Dose
 - Simvastatin
 - Dose
 - Other statin
- Statin + ezetimibe
- Fibrate
- Niacin
- Resin
- Apheresis: (If yes: type/frequency/state date/complications/LDL-cholesterol reduction) – optional

Genetic tests – optional

History of Drug intolerance and Statin myopathy (If yes: choose the drug/s and statin/s applicable) – optional

Smoking

Hypertension

Systolic Blood Pressure - optional

Diastolic Blood Pressure - optional

Diabetes

Blood glucose concentration (mmol/L) - optional

Dutch Lipid Clinic Network Criteria Score (automated)
